

## Demo 3 – 5D™ Design Creator Move Stitches

Create your design in 5D™ Design Creator (available in 5D™ Suite only). When you adjust your design, see it change right before your eyes, in real time.

- Open Design Creator .
- In the ExpressDesign Wizard, choose Start a New Design with No Picture. Next
- Choose No Picture. Next.
- Change Hoop to a 120 x 120 mm creative 120 Square Hoop. Finish.
- Go to the Edit tab.
- Click Insert Embroideries  (blue camera).
- Browse  to Documents\5DEmbroidery\Samples\5DEmb\Stitch2\Geometric then click OK.
- Select Shawl Geometric Flower.vp3 then close the window.
- Move the Design to the center of the hoop.
- Go to the Create tab.

*See the design in 3D in the hoop as you adjust your stitches.*

- Click on the tip of the right dark purple satin area. (You may need to practice where to click to pick up the satin.) Make sure it says curved satin at the bottom right part of task bar.
- Adjust the nodes and see how the satin changes as you watch.
- Use the left and right arrow keys on your keyboard to move through the different satin areas.
- Adjust as desired. (Over emphasize how you can see the change as you move the area.)
